An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. § 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the Issue Fee.

Authorization for this Examiner's Amendment was given in a telephone interview with Mr. Lnych on May 31, 1995.

The application has been amended as follows:

The amendment filed May 16, 1995 has been entered.

Claims 19-22 and 30-36 have been cancelled.

#### IN THE DRAWINGS

The following changes to the drawings have been approved by the Examiner and agreed upon by applicant: In fig. 13, tubular member 87 should be shown as being broken above the break of member 97 rather than at the extreme right end. In order to avoid abandonment of the application, applicant must make the above agreed upon drawing changes.

#### REASONS FOR ALLOWANCE

Claim 18 is allowable over the newly cited Hussein et al. reference because this reference fails to show or suggest a means on the distal end of the shaft section to perform an intravascular procedure which is spaced closer to the distal guidewire opening than the proximal guidewire opening, in combination with all of the other elements in claim 18. In fig. 9 of Hussein et al., the means

Art Unit: 3309

on the distal end of the shaft section to perform an intravascular procedure (heat generating element 506) is not spaced closer to the distal guidewire opening than the proximal guidewire opening as claimed. Claims 23, 26 and 28 are clearly allowable over the Hussein et al. reference because heat generating element 506 of Hussein et al. is clearly not an inflatable balloon as claimed and does not have a distal end spaced closer to the distal guidewire opening than the proximal end is spaced from the proximal guidewire opening.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Thaler whose telephone number is (703) 308-2981.
